INTRODUCING BIGEZO, THE SCHOOL TECHNOLOGY

With great pleasure, we hereby introduce to you a New technology solution named “BIGEZO”. We built this technology as a solution to help parents access their children’s exam-marks remotely (online or via SMS) as often as the school does exams / tests all through the term. The technology also helps the school to manage all its students’ exam results in an organized marks database, design and create report cards for every child, and send Bulk SMS notifications to parents all through the term. The Bigezo technology has two parts: the online web application, and the **FREE** Bigezo Desktop application.

All the 12 functions of the Bigezo Technology

DETAILED FUNCTIONS OF THE BIGEZO TECHNOLOGY

What Parents can do using Bigezo online account

- Parent can login and see their own child's marks for every exam of the term remotely on their phone or tab or PC.
- Parent can download their child's marks in pdf format for printing or sharing in soft copy.
- Parents can submit queries like missing marks and errors in their student's marks to the School Admin.
- Each parent receives an SMS Alert after every new marks release by the school admin.
- Receive their child's marks via SMS
- Contacts for parents to call if they need guidance.

What the School Admin can do using Bigezo online account

- School Admin can manage & upload students' registration database.
- Admin can upload entire class marks for each exam from a single excel file.
- Admin can edit and re-upload students' marks.
- School admin can view the parents' queries for each exam.
- Admin can Bulk-send children's marks via SMS
- Get Free technical support 24/7 from Bigezo engineers/ support team.

What the School Admin can do using Bigezo Desktop Application

- School admin can single/bulk design and create PDF reports for all the students in a particular class at a terrific speed. **Over 100 reports created per minute.**
- Each report has subject-marks, grades, Average, position, the student's photo, remarks from the DOS, requirements, announcements and the date on which the report card was created. The reports have variety of background designs as chosen by the school admin. All these details are auto-generated by the Bigezo Algorithm.
- School admin can send Single/ Bulk SMS to parents or other stakeholders with much convenience. The contacts are saved in the Bigezo database for the school.
20 SMS sent per minute
- School admin can save/ store the school database for all students for every year.
Up to over 50 Million Database records

PROS/ STRENGTHS OF THE BIGEZO TECHNOLOGY

Error Capture

The Bigezo technology has automatic error-checkers that help you eradicate over 90% of the possible mistakes you can make in handling students' marks & reports. The Bigezo error-checkers show you where exactly the error is so that you easily rectify it.

Rich Algorithm

The Bigezo technology uses an accurate algorithm that calculates students' averages, allocates the correct grades for each mark, and determines the student's position in class. The algorithm also determines which students performed below the passmark set by the school admin for each exam and it allocates them a failure notice from the Director of studies. Likewise the algorithm identifies students who have average performance and those who have excellent performance and congratulates them in their reports.

Secure

The Bigezo technology uses a secure password system that has over 3 levels of protection to ensure only authorized login into the accounts. This means the school data is safe.

Visual ProgressBars

The Bigezo technology uses accurate visual progressbars that let the user know the progress of the work being done by the application at that moment.

Beautiful Backgrounds

The Bigezo technology has pre-designed beautiful backgrounds for the report cards. The school admin chooses which one they want to use. The default background is plain-white. However, the technology allows the school admin to use their own custom-designed backgrounds for their reports if they prefer.

User Friendly

The Bigezo technology is compatible with the famous Microsoft Exel Software (Version 2007 and later). This means you get more flexibility and ease to work with and manage your school data.

High Speed Performance

The bigezo algorithm is super fast. It can create & design up to 200 customized reports in just 1 minute. The algorithm also sends 20 SMS within 1 minute.
